Understanding this document

In addition to the detailed indicator text and selection options, in each module of the PRI Reporting Framework, you can find information that will help you identify which indicators are relevant for your organisation.

Top bar

Key information about each indicator is highlighted in the top bar, including the indicator status (mandatory or voluntary) and the purpose of the indicator.

xxx 01	Indicator status MANDATORY	Purpose GATEWAY
--------	--------------------------------------	---------------------------

Indicator status

MANDATORY	Mandatory indicators reflect core practices. These responses will be made public and must be completed to submit the framework.
MANDATORY TO REPORT VOLUNTARY TO DISCLOSE	Some indicators are mandatory to complete, but voluntary to disclose. These indicators may determine which subsequent indicators are applicable or are used for peering, but they may also contain commercially sensitive information.
VOLUNTARY	Voluntary indicators reflect alternative or advanced practices. These indicators are voluntary to report and disclose.

Purpose

Gateway		The responses to this indicator 'unlock' other indicators within a module if they are relevant for your organisation. Please refer to the logic box for more information.
Descriptive		These are open-ended narrative indicators, allowing you to describe your activities.

Underneath the indicator

Underneath the indicator, you can find explanatory notes and definitions that contain important information for interpreting and completing the indicators. Read the logic box to make sure an indicator is applicable to you.

Pathways through the module

Preface

The information reported in this module will allow your stakeholders to identify your organisation type and characteristics. This module also functions as a filter, since your responses will determine which indicators you will see in later stages of the Reporting Framework and will also ensure that you do not have to provide responses to indicators that are not relevant for your organisation.

Summary of updates

There have been no changes to the wording or structure of indicators in this module since 2019.

For a detailed description of changes, please see [here](#).

OO 03	DEFINITIONS
Core business offerings/ main business activity	<p>For dedicated service providers this indicates the main services that you offer to clients that form an essential part of your organisation's activities. The core business offering/main business activity is often the main source of a company's profits and/or revenue and sometimes the activity the company was originally set up to carry out, i.e. their main reason for being.</p> <p>For investment managers, this relates to the services that you also provide that form a substantial part of your non-investment business activity.</p>
Reporting	<p>Services relating to the preparation and presentation of corporate, sustainability or integrated reporting, and financial reporting for clients. This category also includes audit, and external assurance services for clients.</p> <p>Other types of reporting, such as reporting on assets and the performance of investment managers is not covered by this category.</p>
Active Ownership Services	<p>Active ownership is the use of the rights and position of ownership to influence the activity or behaviour of investees.</p> <p>Active ownership services provided at any stage of engagement activities for investors, including engagement or engagement support services, research, and advice. Activity can be individual or collaborative. Services related to any stage of proxy voting, including voting execution and voting advisory. This category includes advice or services related to shareholder resolutions. Activity may also include engagement with policy makers or regulators. This category does not include service providers that only inform their clients of voting outcomes, e.g. as part of a custodial role or similar, or service providers that only provide a platform for voting.</p>
Investment Consultancy	<p>Provision of financial or non-financial advice on a retainer or ad hoc basis relating to environmental, social, and/or governance aspects of investment activity. Services provided do not include active investment management and fiduciary management, or CSR/corporate sustainability services. Examples of investment consultancy services include, custodial services, investment policy development, strategic asset allocation, investment research and manager selection and monitoring.</p>
Research and Data Provision	<p>Collection and preparation of raw data, ratings, or analysis of ESG related information or issues. Offerings may be off the shelf or client tailored. This category includes brokerage firms. Activities that are intended to provide strategic advice or affect investment strategy or key decision making should be reported under Investment Consulting services instead.</p> <p>Examples of research and data provision services include, but are not limited to, analysis, benchmarking reports, ratings, raw data and surveys.</p>
Other	<p>In this instance, 'Other' will apply to any service provider signatory that does not offer any of the above services. If you report 'Other', a separate indicator will be activated that will allow you to describe this business activity.</p>

Clients are able to choose whether ESG considerations shall be incorporated into the service for an additional fee.</p> <p>If you offer a specific ESG integrated product as a standalone product within your overall business offering that clients may opt into for an additional fee, this should be reported as an ESG supplementary service.</p> <p>Example:</p> <ul style="list-style-type: none"> - An asset consultant that provides manager selection appointment and monitoring services. The investment consultant offers to incorporate ESG as a service for an additional fee that clients may add on.
